> ➢ With a one-click call, one-button business consulting and light status indication, its working status is clearly visible.
> ➢ Support RS485 data transmission protocol; Maximum distance between , SOS panel and network player is greater than 1500 meters.
> ➢ Environmental friendly and highly efficient.

*D*escription

> Intercom expansion controller is a high-performance and high-definition Intercom expansion controller. MAG6465 functions with one-click SOS call, MAG6466 with one-click call and one-click business consulting. This is an automatically paging platform which can request intelligent network and quick SOS, supporting independent recording intercom content, expansion, real-time recording and long-distance transmission expansion. Owing to it high efficiency, it can be used for a variety of occasions

Specification

Indicator item		Technical requirements
model		MAG6466
Monitoring speaker	Rated output	≥2W
	frequency	100Hz-20KHz
	Distortion	≤1%
	SNR	≥70**db**
Mic phone		Condenser
Sensitivity		≥30mV
Microphone input Mute sensitivity		≥30mV
Quiescent Current		≤10mA
Working electricity current		≤70mA
Data interface		RS485
Function key		SOS call/Business Consulting
Power supply		DC24V/0.2A
Unite size（L×W×H　mm）		172×86×40
Packing size（L×W×H　mm）		210×170×85
Gross weight		
Net weight		0.36kg
color		Aluminum white
Operating temperature		-20℃～50℃
environment humidity		≤90%
