

DSP9327A

IP Waterproof Telephone with Loudspeaker and Warning Light

Description

The DSP9327A waterproof sound and light amplifier telephone supports the standard SIP protocol and can be effectively compatible with commonly used IPPBX and network dispatching platforms in the market. It is specifically designed to respond to high humidity and high dust in such areas as subway tunnels, underground tunnels, highway tunnels, mines, power plants, steel plants, ports, ships, and electrolysis workshops. This telephone is suitable to be installed in various harsh environments as it is defined by waterproof, moisture-proof, dust-proof, cold-proof, frost-resistant, high-temperature, and Oxidation, anti-corrosion, anti-violent percussion and other properties.

Features

- Aluminum alloy material
- IP68 waterproof level
- Support SIP protocol
- Support IP call function
- Phone call warning and flashing
- Phone call auto broadcasting
- Built-in amplifier and buzzer and speaker

Specifications

Model	DSP9327A
Protection level	IP68
Product material	Aluminum alloy
Product color	Outdoor yellow
Power supply	220V AC
SIP line	Maximum 2 channels
DTMF	In-band/RFC2833/SIP info
DNS SRV	RFC3263
SIP protocol	SIP 2.0
Speaker power	8Ω 30W
Installation method	Wall-mounted
Network characteristics	LAN/WAN
Encoding	G.711(A/μ) / G.729A/B/AB / G.726 / iLBC / G.722/L16
Firewall	VPN L2TP, DMZ
IP Call	Support point-to-point calls
Speaker volume	≥120dB
Product Dimensions	320×255×138mm

Product Information

- ① Alarm Light
- ② Magnetic Induction Hook
- ③ Phone Handset Cord
- ④ Silicone Keys
- ⑤ Handle
- ⑥ Connector
- ⑦ Damping Shaft
- ⑧ Stainless Steel Lock Catch
- ⑨ Silicone Loop
- ⑩ Speaker
